ULTRA High Quality

The DPB provides a 5V (3A) power supply that can be used to power various types of mediaplayers.

For mediaplayers that require more power or a different voltage, the display controller also features a 24V (4A max) out.

CARD

3 X USB

OPTIC

ETHERNET

MIC

Communication

All our mediaplayers have direct communication with the CMS in the DiMare screen, giving you complete control to use the unique features of the CMS.

Custom Mediaplayers

If your application has specific demands (hardware / OS) please contact us so we can investigate if this configuration can be used in combination with our DiMare screens.

Type of Aluminium finishes

The DiMare multimedia displays with aluminium frame (narrow and wide) are powder coated in black or white color. But can optionally be supplied in other colors and finishes.

Extended warranty to **4 years**

Powder coat frame

Powder coat in a different color of your choice is possible.
Subject to availability of the color you require.

Brushed Aluminium frame

Optionally, it is possible to finish the aluminium frame brushed and anodized. You can choose from 5 standard colors.

Polished Aluminium frame

Optionally, it is possible to finish the aluminium frame polished. You can choose from 5 standard colors.

Specific color of choice

Aluminum frames can also be delivered in other colors.
The color you require is subject to availability.

Cover Customizations

Custom print logo

The glass of your display (frame cover and frameless cover) can be printed with your own design or color.

Different Size Cover

It is possible to place multiple screens behind 1 display cover.

A completely different design of the cover is also possible.

Let us know what your wishes are.

Content Management System

Designed for versatility and flexibility

Mikrodel has a modular structure. There is a basic configuration that can be expanded with additional modules.

You can add these if this is necessary for the application.

In this way you always put together the ideal configuration and therefore do not pay for modules that you never use.

Although DiMare screens can be fitted to any CMS and any OS, we optionally offer our screens with Mikrodel.

Mikrodel is a very versatile solution and suitable for applications such as smart buildings, internal communication, digital signage, advertising, retail and much more.
